# North Indian Calendar

We are pleased to release the 2011 calendar based on Hindu dharma shastra and drika siddhanta. This calendar is specially prepared for the Greater Toronto area, and it may not be applicable in other parts of the world. All time presented here is adjusted for daylight saving time.

**Calendar Types:** There are two main types of calendars. One is the Solar Calendar which is used in Tamilnadu, Orissa, Bengal, and Kerala. The other is a Luni-Solar Calendar based on Chandramasa. In the Luni-Solar calendar there are two types: Amavasyant - months ending in Amavasya; and Purnimant - months ending on Purnima. The Amavasyant is used in Gujarat, Maharashtra, Karnataka, Andhra Pradesh, Tamilnadu & Kerala (along with Solar Calendar). The Purnimant calendar is used in North India.

**Tithi:** In the lunar calendar the moon takes a month for each revolution around the earth. The lunar calendar is divided into two groups called Pakshas. The first one is called Krishna Paksha (or dark fortnight) which is when the moon is waning. The second is called Shukla Paksha (or bright fortnight) which is when the moon is waxing. Each paksha is divided into 15 thithis. The first 14 thithis are the Sanskrit numbers from 1 to 14 (Prathama, Dvithiya etc). The 15th thithi of Shukla Paksha is Purnima (full moon) & the 15th of the Krishna Paksha is Amavasya (moon is not visible as it is closest to the sun). So a lunar month consists of 30 thithis and each thithi then corresponds to the time taken by the moon to move 12 degrees, with respect to the sun. Krishna Paksha tithis are in the darker color with dark background, and Shukla Paksha tithis are mentioned in the red color with white background.

**Nakshatra:** There are 27 Nakshatra (constellations) in the Zodiac. A Nakshatra is the zodiac constellation in which the moon is found on the particular day. Nakshatras are in *italics*.

**Timings listed in the Calendar:** The times listed after a Thithi & Nakshatra are the times at which the Thithi or Nakshatra ends. The panchanga uses the Vedic definition of a day, i.e., a day starts with sunrise and ends with the subsequent sunrise. Thus, a thithi with a time of 29:00 indicates that the thithi ends before the next sunrise. According to the western calendar, this means that the thithi ends at 5:00 AM (29:00 – 24:00) on the next day. Hence 24:00 means 00:00 hours of the next day, 25:00 means 1:00 AM of the next day, 29:00 means 5:00 AM of the next day. This is standard for any panchangam.

### How to read the panchangam:

- The time next to the tithi and nakshatra is the time when it is going to end. If tithi or nakshatra ends after midnight but before next sunrise the end-time will have a value greater than 24 hours. To get actual time, please subtract 24 from the time. The English date and day will be changed after midnight but not so for the Indian date and day. Indian day/date does not change at midnight 0:00 hours and it is from one sunrise to another sunrise. e.g. Trayodashii 08:18. This means Trayodashi ends at 8 hours 18 minutes.
- The time next to the nakshatra indicates when it is going to end. The same rules for tithi timings apply to nakshatras as well. E.g. Rohinii 09:02. This means Rohini nakshatra ends at 9 hours, 02 minutes. Nakshatra is also known as a Star. This way you can find your child's birth star.
- The time for Sun's samkramana is when sun will enter that rasi or sign on that day. e.g. Makara 4:36 means Sun is entering Makara rasi at 4 hour 36 minute.

**Uttarayana / Dakshinayana:** The season occurs based on tropical sun (without ayanamsha). This is due to earth's tilt of 23.45 degrees. The earth circles around sun with this tilt. When the tilt is facing the Sun we get summer and when the tilt is away from the Sun we get winter. Because of this tilt it seems like the Sun travels north and south of the equator. This motion of the sun is called Uttarayana – The sun is moving towards North and Dakshinayana the sun is moving towards South. This motion of the sun moving towards the north is called Uttarayana. When it is moving towards the south it is called Dakshinayana. This causes rise to seasons. They are dependent on equinoxes and solstices.

There is a common misconception that Makar Samkranti is the Uttarayana. This is because at one point in time Sayana and Nirayana Zodiac were same. Every year equinoxes slides by 50 seconds due to precision

of equinoxes, giving birth to Ayanamsha and causing Makar Samkranti to slide further. As a result if you think Makar Samkranti is Uttarayana then as it's sliding it will come in June after 9000 years. However Makar Samkranti still holds importance in our rituals as a Samkranti. All Drika Panchanga makers will use the position of the tropical Sun to determine Uttarayana and Dakshinayana. Hence January 14<sup>th</sup> isn't Uttarayana. Actual Uttarayana occurs on December 21<sup>st</sup>/22<sup>nd</sup> of every year.

For more details please visit <http://www.mypanchang.com> or write to [shastriji@mypanchang.com](mailto:shastriji@mypanchang.com).

**Kari Dina:** Avoid Kari Dina for your auspicious activities. This calendar has marked Kari Dina's.

**About mypanchang.com:** mypanchang.com is the most popular website site that provides the most accurate panchangam in English, Gujarati, Hindi, Kannada, Marathi, Telugu, and Tamil languages as per North and South Indian calendar systems for over more than 350 cities all over the world. Most temples in the world rely on mypanchang.com for accurate panchang data and festival observance times. Please visit mypanchang.com for more details. The panchang data and festival data presented here are the most accurate according to Hindu Vedic Tradition and in accordance with Hindu dharma shastra. If you have any questions about confusion about any festival please contact mypanchang.com and we'll provide you with a further explanation.

31	07:36	17:26	05:56	08:50-10:04	11:17-12:32	13:44-14:59	12:11-12:51	12:50-13:31, 14:48-15:28	09:06-10:47	19:16-20:58

Notes: To find auspicious time one need to avoid inauspicious times like Rahukalam, Yamagandam, Gulikai, Durmuhurtham and Varjyam times. Abhijit Muhurtha and Amritkalam times are good times. If the times in Abhijit muhurtha and Amritkalam times are overlapped by inauspicious times we need to remove inauspicious times and use only auspicious times, after removing inauspicious times from Abhijit muhurtha and Amritkalam times.

28	06:57	18:04	04:34	08:20-09:44	11:07-12:31	13:53-15:17	12:08-12:53	12:52-13:37, 15:05-15:51	14:45-16:30	25:11-26:55

Notes: To find auspicious time one need to avoid inauspicious times like Rahukalam, Yamagandam, Gulikai, Durmuhurtham and Varjyam times. Abhijit Muhurtha and Amritkalam times are good times. If the times in Abhijit muhurtha and Amritkalam times are overlapped by inauspicious times we need to remove inauspicious times and use only auspicious times, after removing inauspicious times from Abhijit muhurtha and Amritkalam times.

**This Calendar is prepared using Toronto's Longitude and Latitude. The Daylight saving time is adjusted in the times mentioned here.**

27	07:09	19:37	03:33	18:03-19:37	13:23-14:57	16:30-18:04	12:59-13:48	17:57-18:47	21:34-23:18	07:52-09:33
28	07:08	19:38	04:08	08:41-10:16	11:49-13:24	14:56-16:31	12:59-13:48	13:48-14:38, 16:17-17:08	19:16-21:02	07:57-09:41, 29:50-31:36
29	07:06	19:40	04:37	16:30-18:06	10:14-11:49	13:22-14:57	12:58-13:47	09:36-10:28, 24:40-25:31	21:44-23:31	
30	07:04	19:41	05:02	13:22-14:57	08:38-10:14	11:47-13:23		12:57-13:48	28:05-29:53	08:26-10:13
31	07:02	19:42	05:25	14:56-16:32	07:02-08:38	10:12-11:48	12:58-13:47	11:15-12:07, 16:19-17:10	30:07-31:55	14:51-16:39

Notes: To find auspicious time one need to avoid inauspicious times like Rahukalam, Yamagandam, Gulikai, Durmuhurtham and Varjyam times. Abhijit Muhurtha and Amritkalam times are good times. If the times in Abhijit muhurtha and Amritkalam times are overlapped by inauspicious times we need to remove inauspicious times and use only auspicious times, after removing inauspicious times from Abhijit muhurtha and Amritkalam times.

Notes: To find auspicious time one need to avoid inauspicious times like Rahukalam, Yamagandam, Gulikai, Durmuhurtham and Varjyam times. Abhijit Muhurtha and Amritkalam times are good times. If the times in Abhijit muhurtha and Amritkalam times are overlapped by inauspicious times we need to remove inauspicious times and use only auspicious times, after removing inauspicious times from Abhijit muhurtha and Amritkalam times.

Notes: To find auspicious time one need to avoid inauspicious times like RahuKalam, Yamagandam, Gulikai, Durmuhurtham and Varjyam times. Abhijit Muhurtha and Amritkalam times are good times. If the times in Abhijit muhurtha and Amritkalam times are overlapped by inauspicious times we need to remove inauspicious times and use only auspicious times, after removing inauspicious times from Abhijit muhurtha and Amritkalam times.

31	06:41	19:54	09:53	13:17-14:57	08:20-10:00	11:38-13:18		12:51-13:44	25:29-26:56	12:55-14:20	

Notes: To find auspicious time one need to avoid inauspicious times like RahuKalam, Yamagandam, Gulikai, Durmuhurtham and Varjyam times. Abhijit Muhurtha and Amritkalam times are good times. If the times in Abhijit muhurtha and Amritkalam times are overlapped by inauspicious times we need to remove inauspicious times and use only auspicious times, after removing inauspicious times from Abhijit muhurtha and Amritkalam times.

31	07:52	16:49	11:20	10:06-11:14	13:27-14:35	07:52-09:00	12:02-12:39	07:52-08:29, 08:28-09:04	10:13-12:00	20:52-22:39	

Notes: To find auspicious time one need to avoid inauspicious times like Rahukalam, Yamagandam, Gulikai, Durmuhurtham and Varjyam times. Abhijit Muhurtha and Amritkalam times are good times. If the times in Abhijit muhurtha and Amritkalam times are overlapped by inauspicious times we need to remove inauspicious times and use only auspicious times, after removing inauspicious times from Abhijit muhurtha and Amritkalam times.
